

CHEN JUN MING

AI/ML Engineer

Singapore Citizen | P: +65 9750 5813 | chenjm246@gmail.com | [linkedin.com/in/jun-ming-chen](https://www.linkedin.com/in/jun-ming-chen) | junmingg.github.io/portfolio

WORK EXPERIENCE

Modular Asset Management

Software Engineer

Singapore

Feb 2026 – Present

- Fine-tuned and deployed an LLM via vLLM on an AKS GPU node, quantizing to INT8 W8A8 weights using LLM Compressor with an INT8 KV cache on an Nvidia A100, **boosting throughput 40% over benchmark**
- Re-architected unreliable legacy scripts and Excel macros into containerized Airflow pipelines on Kubernetes with monitoring and auto-recovery, **cutting daily job failures by ~80%** and **reducing manual reruns by ~70%**
- Maintained and updated configuration files for ETL pipelines and system mappings, supporting overall automation and **ensuring 99% uptime** on daily business-as-usual operations
- Built trade-volume and P&L agents that pull from Postgres and Outlook, **saving ~5 analyst-hours weekly**

ST Engineering (Mission Software & Services)

Senior AI Engineer

Singapore

Apr 2025 – Feb 2026

- Architected a RAG chatbot from scratch — a multi-agent system automating retrieval, filtering, and analysis — **cutting analyst data-retrieval time by 70%** and turning ad-hoc research into self-serve insights
- Improved Entity Extraction and added Coreference Resolution to De-duplicate entities, **improving accuracy by 60%** (50%→80%) of an existing POC built by a client.
- Deployed GitLab, Dataiku, and Stable Diffusion across **air-gapped servers** for secure, compliant AI delivery

Yokogawa Engineering Asia

Data Scientist

Singapore

Aug 2024 – Apr 2025

- Designed a two-stage detection-and-recognition model for shipping-container-number OCR, deployed as a production-ready API — achieving **98.8% mAP** and **cutting manual data-entry errors ~90% across downstream logistics**
- Enhanced a Health & Safety object-detection model with a web-app POC, **expanding coverage to 15+ classes**
- Refactored a product for OS compatibility and performance, **reducing object-detection pipeline runtime ~30% and fixed a bug that causes the object-detection pipeline to take 50-200% longer to process.**

Ai Palette

Data Scientist

Singapore

May 2022 – Apr 2024

- Integrated Stable Diffusion XL image generation as an API into a POC, **accelerating creative content delivery by 75%**
- Engineered vector search into a production database, **sharpening query precision and reducing false positives by 85%**
- Shipped an end-to-end ML model as a containerized API on Kubernetes, predicting user demographics at **~75%**
- Built in-house web applications that streamlined and automated team workflows, **improving operational efficiency ~30%**
- Created and owned the Flavor Wheel visualization end-to-end, **driving \$100K in revenue and retaining a flagship client**; earned **Google's Trailblazers Transformation Award** and presented demos to Google, EDB, and MDDI representatives

Ai Palette

Data Science Intern

Singapore

Dec 2021 – Apr 2022

- Delivered custom analytics tailored to client specifications, **accelerating insight turnaround ~40%**
- Automated logic validation and data wrangling in Python, **cutting manual pipeline upkeep ~60%**
- Minimized noise in unstructured text using regex techniques, **reducing false positives ~50%**

TECHNICAL SKILLS

Languages & Databases: Python, SQL, Elasticsearch, Postgres, MongoDB

ML & Modeling: Scikit-learn, TensorFlow, PyTorch, NumPy, Pandas

Generative & Agentic AI: vLLM, Llama.cpp, Ollama, LangChain, Claude Code, Open Code, OpenClaw, Hermes Agent

Data Engineering & Cloud: Hadoop, Spark, AWS, GCP, Azure

Visualization & Web: Matplotlib, Seaborn, Plotly, Streamlit, Flask, FastAPI, Django, Svelte, Tailwind

Typing Speed: 150+ WPM

CERTIFICATIONS

AWS Solutions Architect – Associate • AWS Cloud Practitioner • Deep Learning Specialization (DeepLearning.AI)

EDUCATION

Georgia Institute of Technology

Master of Science, Computer Science

2022 – 2026

GPA: 3.9/4.0

Singapore Management University

Bachelor of Science, Economics (Data Science & Analytics)

2018 – 2022

Cum Laude
